# Airspace Integration Trials Programme

Enabling advanced aviation

# Goals of the Programme

- Support the safe testing, development and market validation of advanced unmanned aircraft in New Zealand
- Help deliver the Government vision to integrate unmanned aircraft into the transport system
- Promote New Zealand as a research hub for advanced aviation concepts
- Develop the social acceptance of unmanned aircraft into everyday usage

# Current Partners

## Wisk

## Envico

Delivery of environmental support payloads.  
Working with DoC on predator baiting.

## Kea Aerospace

Long term sustainable flight through solar energy.  
Aerial imagery applications.

## Pyper Vision

## Merlin Labs

Converting aircraft to unmanned operations.  
Using AI for operations and communications.

## Dawn Aerospace

Sub-orbital operations and satellite launch.  
Low-impact propulsion systems.

## Swoop

## Aeronavics

Agricultural UAV applications.  
Farm management and monitoring.  
Eradication of Wilding Pines

**COMING SOON!**

# Thank you.
