**2015**  
First Manned\*  
Flight  
2nd Generation

**2017**  
First Gen 4 Full  
Transition  
4th Generation

**2014**  
First Full  
Transition Flight  
1st Generation

**2017**  
First Manned\*  
Full Transition  
3rd Generation

**2018**  
Cora  
Unveiled  
5th Generation

*\*Flights flown under the control of an onboard pilot.*

# The Wisk Flight Path

- Wisk is currently developing our self-flying Generation 6 aircraft which will be certified for commercial operations
- Within 5 years of entry into service Wisk will:
  - have launched in 20 cities globally
  - conduct 14M annual flights
  - ferry 40M passengers
  - produce several thousand aircraft

# Self-flying First

- Piloted vs. self-flying
- Improved safety
- Where UAM is ultimately headed
- Easier to scale:
  - Pilot shortage will become a problem
  - Lower cost
  - Simpler to maintain

# Aotearoa: Growing the Future of Aviation

- A regulatory environment that enables innovation
- An integrated aviation ecosystem
- A skilled and innovative workforce
- A population that are early adopters of technology
- Suitable geography and climate

**Thank you**
